Investment in Locally Controlled Forestry: Implementation of the guide

Chris Buss
UNFF Ad Hoc Expert Group on Forest Financing
Vienna, Austria
16th January 2013
Why now?

- The need to mobilise the growing amount of funds available for investment in forests – carbon & impact investment as examples
- Development of a process for improving the quality and quantity of investments in locally controlled forests
- Identification of viable options for investment through international and national economic assessments of carbon stocks
- Interest with investment funds, philanthropic foundations
Moving forward – implementation of the guide

• Identify priorities and opportunities to enhance the mobilisation of private sector investments in LCF activities,
• Develop partnerships and a framework of engagement that can provide ideas, innovative financing mechanisms and support for investments in LCF activities.
Investment opportunities

• Rights holders – to build resilient and viable economies, reinforce tenure & rights

• Governments – SME’s and forest investment driving growth, multiple social benefits (health, education), improved landscape management

• Donors & NGO’s – a model for local development

• Climate change – low carbon development & enhance carbon stocks through improved forest management

• Investors – real returns and a move beyond CSR
Types of investment

Enabling Investment
• Made by governments, donors, NGOs, philanthropists, rights-holders
• To create the conditions for productive investments in assets.
• SME forestry business models, associations, market linkages and new technology.

Asset Investment
• Not expected to lose the nominal value of the underlying capital, even if the anticipated level of financial return may vary according to the needs
• The capital invested is an asset, which either has immediate tangible value or gives the right to receive future cash flow.
• Profit-oriented investors are looking for places to invest their money and earn a return on their assets. They include banks, government sovereign wealth funds, private equity funds and pension funds.
• Product-oriented investors are involved in some kind of manufacturing or sales business and are either seeking raw materials, or products they can sell. They include processing mills, specialist manufacturers and wholesalers.
## Investment Framework

## What does enabling investment achieve?

<table>
<thead>
<tr>
<th>Task</th>
<th>Constraints</th>
<th>Action</th>
</tr>
</thead>
</table>
| Influence the **external** conditions | • Governance  
  • Tenure  
  • Isolation | **Organise** through cooperatives, associations & federations |
| Improve the **internal** conditions | • Organisational structure  
  • Sufficient capability to execute the plan | **Seek & manage partnerships** |
Ingredients for success

• Clarity of tenure and rights
• Good enough governance
• Organisation to define roles and generate economies of scale
• Forming partnerships
• Business Development Services
• Intermediaries and brokers
• Transparency and accountability
• Agreed goals and expectations
• Checks and balances
• Respect different values and embrace change
Cycle of investments

1. Rights-based advocacy
   - Commercial forest rights
2. Enterprise support
   - Business capacity
3. Organization-building
   - Enterprise-oriented organisation
4. Brokering deals
   - Fair and balanced asset investment
Roadmap to Success

ILCF Guide & Process

- Proposition
  - Aim to build a sustainable business
- Establishment
  - Institutional development & partnerships
- Validation
  - Situational analysis & feasibility
- Preparation
  - Business plan, funding model & offer to investors
- Negotiation
  - Due diligence, terms and shared vision
- Performance
  - Impact monitoring and conflict resolution
Roadmap to success
Enabling Investment – the next step

- Forest and Farm Facility aims to develop institutions at local level.
- Further understanding of opportunities for asset investment – understanding the value chain and policy frameworks at national level.
- Develop partnerships (international, regional, national & local) with private sector and enabling investors to mobilise enabling investment in order to develop investment propositions.
Thank you!
