Tasks for breakout session on challenges inherent in implementing various REDD finance mechanisms

Six stakeholder groups:

(i) Indigenous groups, communities, labor
(ii) Industries, private investors
(iii) Governments
(iv) Intergovernmental organizations
(v) International environmental NGOs
(vi) Science, research and education

Working Groups meet on Saturday afternoon during 2 hours and report back to the plenary during 30 minutes each on Sunday morning.

Task: Give ideas on how your particular stakeholder group might react on the following set of questions:

1. Scope of financing
   - What type of forestry activity should be included in forest-based mitigation financing?
   - How to ensure appropriate access by countries to such financing?

2. Revenue raising
   - How funds should be raised for REDD/REDD+? Fund or market-based, or a combination of both?
   - What mechanisms should be used to raise financing?

3. Revenue disbursement
   - National, sub-national or project approach for REDD/REDD+? Or both?
   - Fragmented (decentralized) or consolidated (centralized) financing?

4. Sharing of benefits
   - How to ensure a proper sharing of benefits?
   - Sharing between whom? Who, how and how much?
   - How to deal with financing co-benefits?

5. Effective participation of stakeholders
   - What is needed to ensure effective participation in the development and implementation of REDD financing mechanisms?
   - Who pays for it?

6. Other issues related to financing REDD that you consider important as a stakeholder group that we have missed?
   - List the issues that you want to see further developed
