# 4Fs Brazil

# The Brazilian 4Fs Dialogue - november 2012

# Diversity

Brazil is recognized as the country with the world's greatest biological diversity.  
20% of the planet's biodiversity

06 Biomes and the maritime zone

194 million people

# The sectors and the Family Farming

Soybean, sugar cane, cattle and planted forest sectors occupy about 80% of the total area occupied by farming activities.

20% of the farming space - 70% of the food consumed

## Population dynamics

In Brasil 85% of the population lives in urban areas.  
Projection for Latin America - 90% until 2020.

# Conservation

Conservation Units

Other protected areas

Areas to be protected - Areas to be restored

 Sistema Nacional de Unidades de Conservação da Natureza

# Impacts:

Production expansion, deforestation, ecosystem fragmentation, pesticides

# Climate change

Impact on people lives, on agriculture and economy

# Desertification

# Challenges and Strategies

# Integrated landscape planning and zoning of the sectors

# Legislation and Monitoring - Policy

Expansion - Not convert new areas

# Stepping up production

in all sectors

# Integration for diversification

# Support to expand family farming - Agrobiodiversity

# Stemming the rural exodus - Return to rural areas

# Expansion of protected areas

# Incentives environment services payments

Brazil has major challenges ahead, but also immense possibilities - Choose the right strategies

## The Brazilian Forests Dialogue

- ✓ Priority issues
- ✓ Discussion and consensus
- ✓ Implementation of cross sector dialogue
- ✓ Building Capacity and Engaging small scale stakeholders

The Brazilian Forests Dialogue will lead the 4Fs process in 2014.
