Share of economic activities in regional GDP

the other 7% are taxes and subsidies

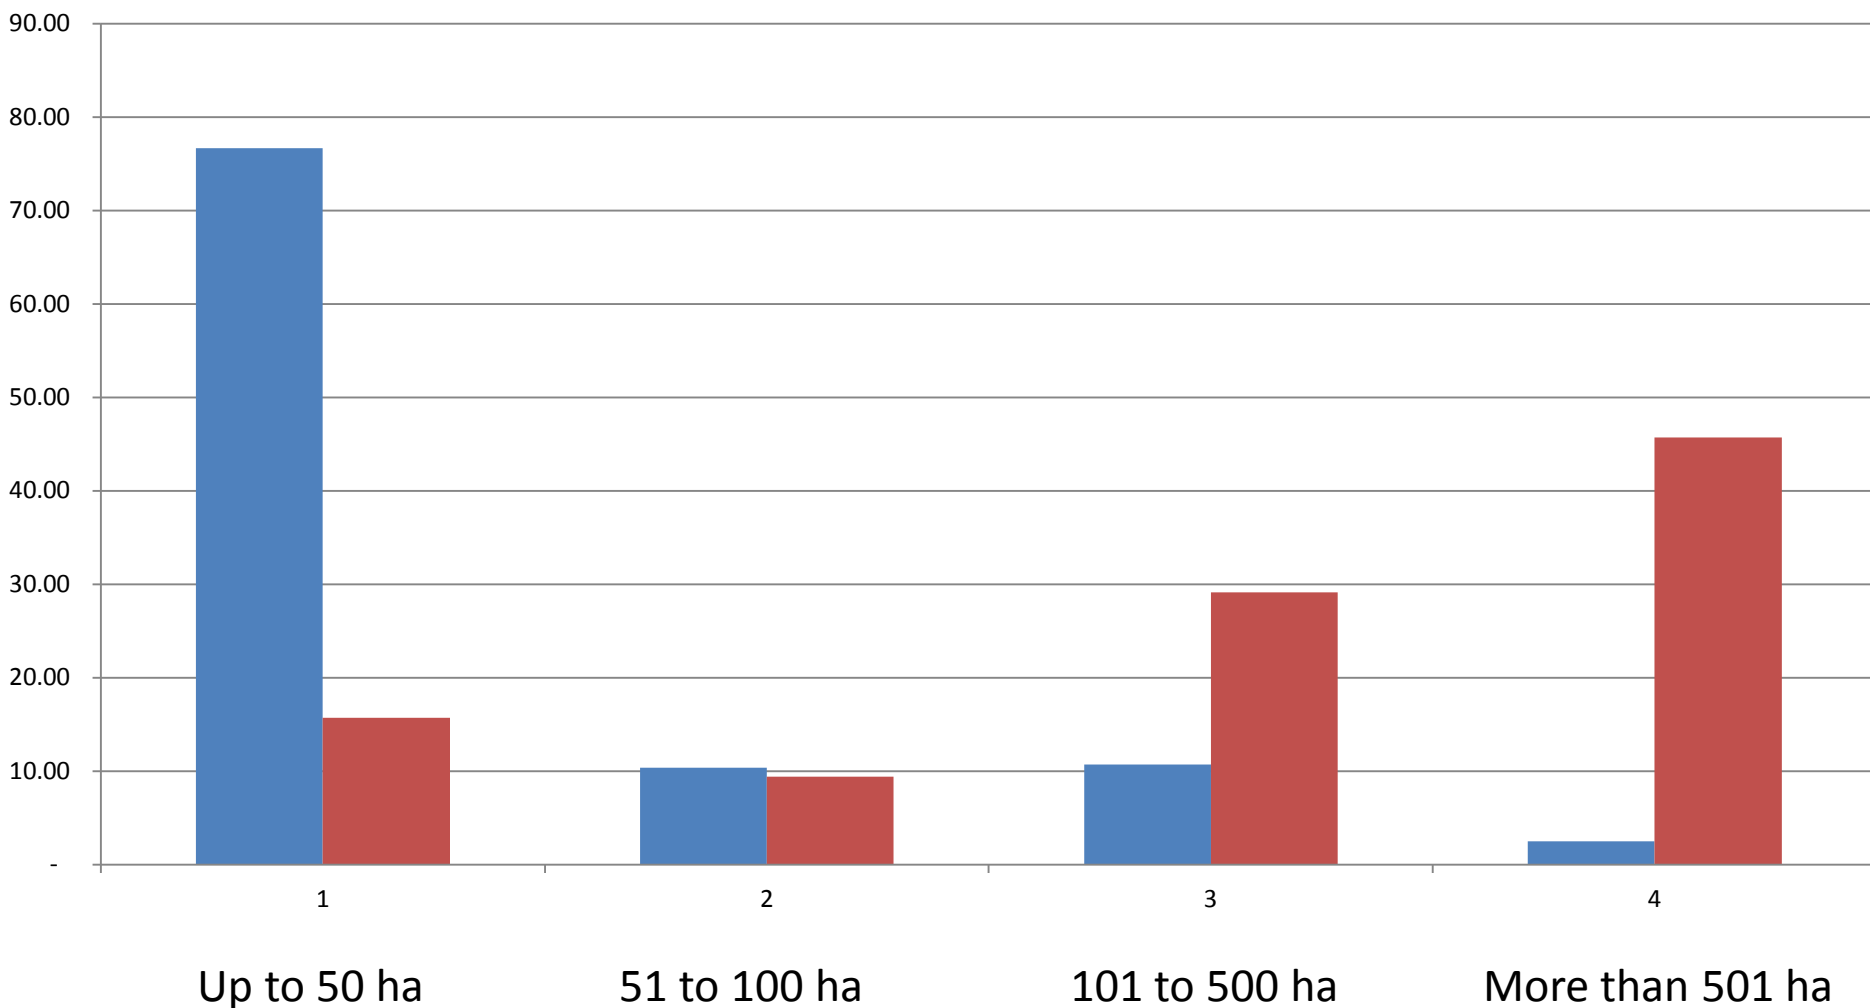

Property Owner Educational Level (%)

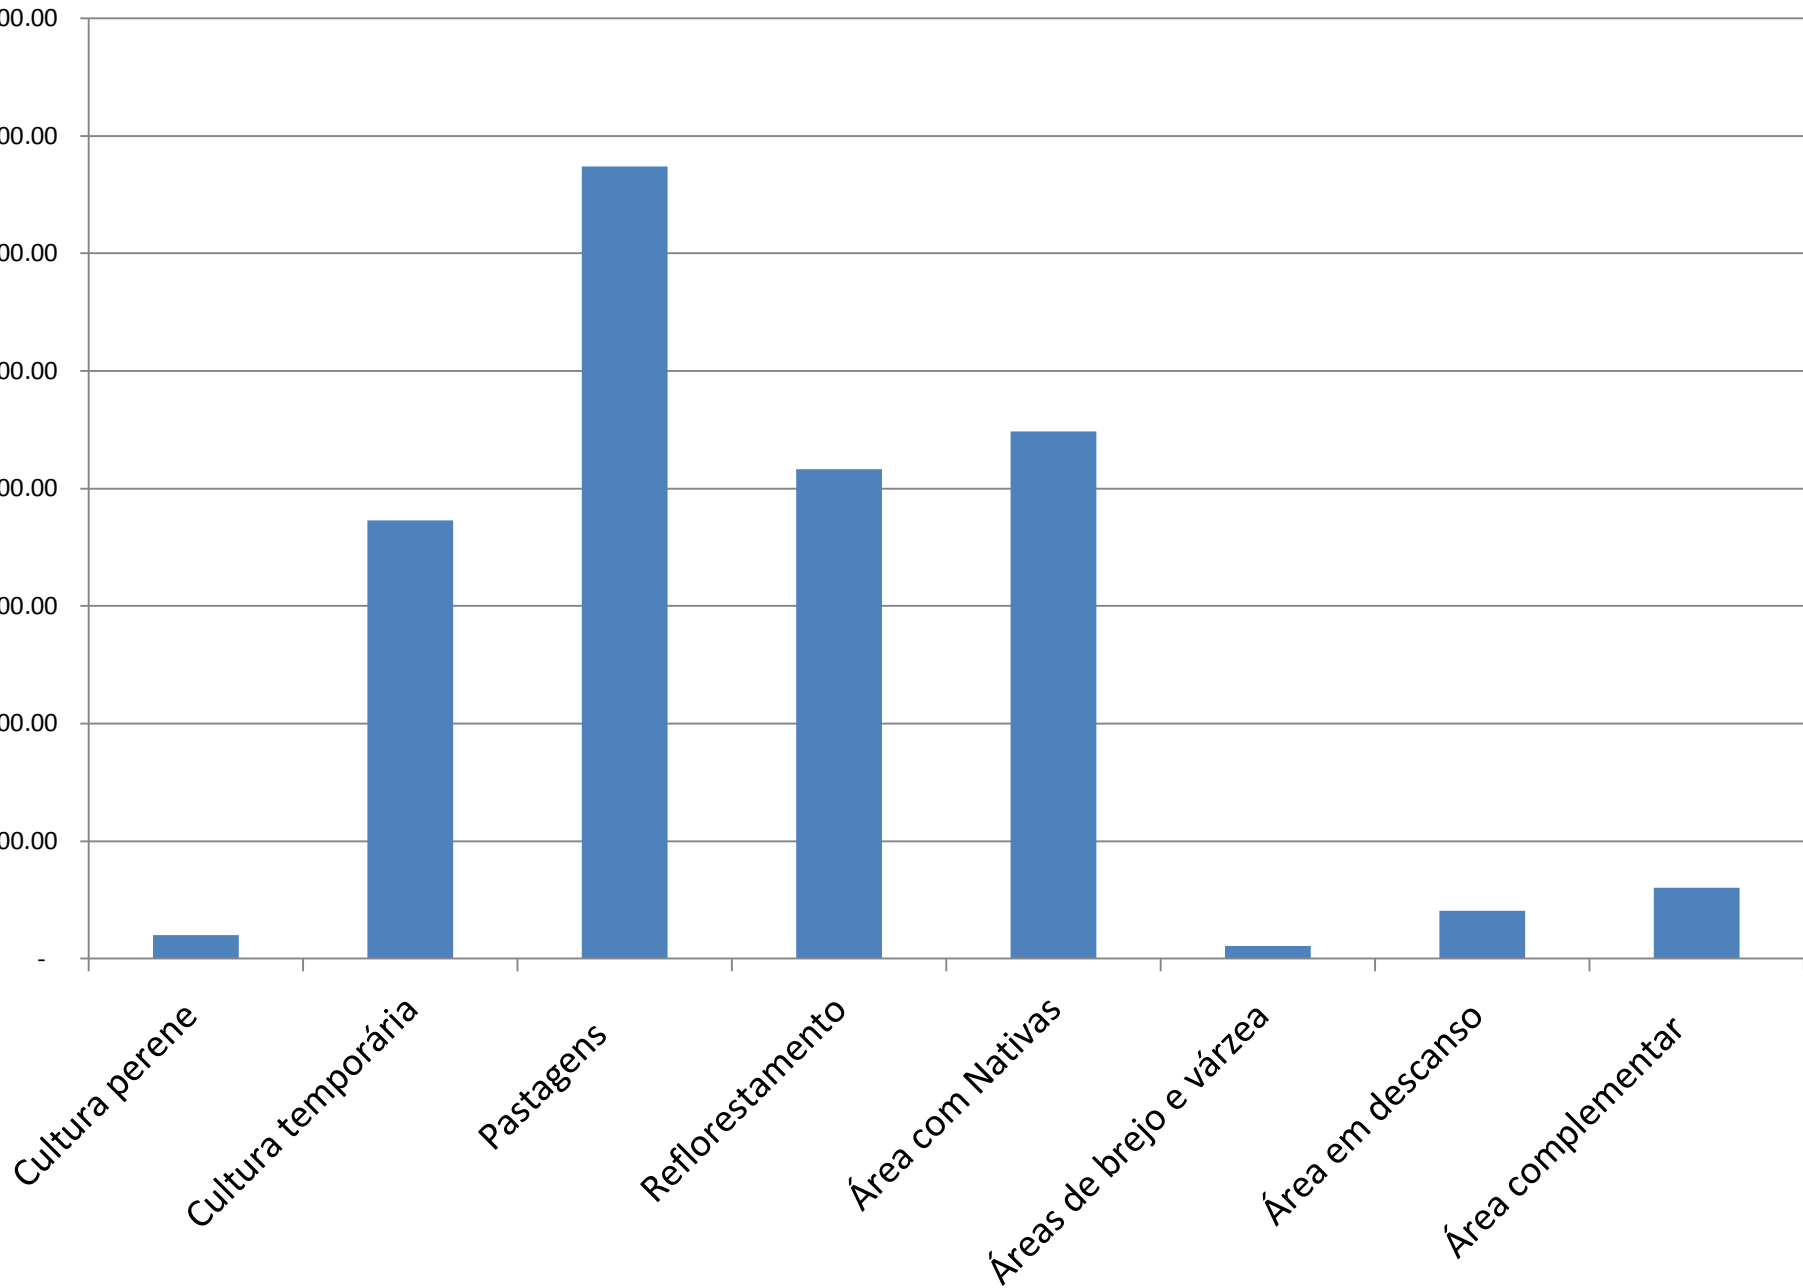

Agricultural production units

Area (in hectares)

Hectares

Looking to the Future

- Development of the tourism production chain.
- Agriculture will be increasingly treated as a business.
- Family farming will be obliged to organize itself.
- The region is close to major urban centers.
- Areas devoted to livestock should diminish.
- Companies carrying out reforestation should rethink regarding their investments.

Thank You
