First Day – Working Group-Level Discussions

WORKING GROUP-LEVEL DISCUSSIONS OF KEY ISSUES

TUESDAY SEPTEMBER 16, 2008

8:00–9:00 **Registration**

9:00–09:45 **Welcome Remarks**

10:00–12:30 **Parallel Panel Discussions: Stakeholder Perceptions of Progress of Forests Contribution to Climate Change**

This series of panel discussions will look at the progress towards sustainable management, restoration of forest ecosystems and reforestation, from the perspective of a broad range of stakeholders. They will identify the policy constraints to faster progress and recommend strategies for assisting national governments to overcome such policy constraints. The panels will also assess the trade-offs and opportunity costs of alternative REDD and carbon sequestration strategies.

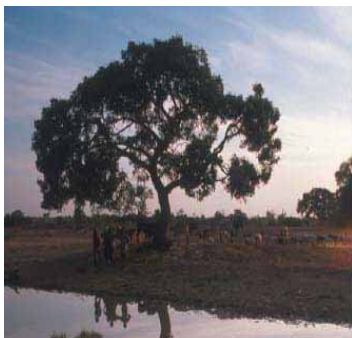

12:30-13:30 **Lunch**

13:30-15:30 **Parallel Panel Discussions: Investment Needs: Opportunities and Challenges**

This series will look at the investment needs and opportunities for addressing deforestation and degradation including possibilities for establishing forest resources in “forest poor” countries. These will identify the potential that reforestation of degraded lands, establishment of new plantations, and agro-forest resources have to contribute to increased carbon sequestration in ways that will also alleviate poverty.

Prospects for private sector company /community/smallholder partnership-based approaches will be highlighted. Opportunities and constraints for investment in biofuels will be also reviewed.

16:00-17:30 **Discussion of draft Forest Leader’s Statement**
