

The Forests Dialogue

STEERING COMMITTEE MEMBER

Sarah Price

I have 20 years experience working in the environmental sector on sustainability issues. My experience spans from international forest policy to operational forestry and field biology, and across diverse backdrops from South America (Guyana, Bolivia), Southeast Asia (Indonesia, Vietnam), North America (Canada, USA) and Europe.

I enjoy working at the interface between private and non-profit actors forging constructive alliances and pathways towards sustainability outcomes. I have proven competency in embedding sustainability into supply chains, certification and traceability, fundraising, partnership establishment, strategic programme development, project management, communications, and facilitation.

I'm passionate about forests and committed to improving the way people manage, value and respect them.
