

Question #2 – Challenges for 1BT program to deliver tangible outcomes?

1. Land, seed, and labor availability (inputs) including participation by Iwi and smallholders (everyone) in providing them
2. Communication and transparency with communities/Iwi in order to build the social license to execute 1BT
3. Development of market demand/economic models and necessary infrastructure for native species' timber and non-timber products
4. Ensuring survivability, aftercare, and monitoring system for results
5. Strategic planning including mapping in a multi-stakeholder manner the landscape to ensure "right place" using an ecosystem approach
