

!1BT! – Communication and engagement

- Multi-stakeholder platform to engage different audiences
 - Audiences: General public and Maori/landowners
 - Federation of Maori authority
 - Small grower association
 - Deliverers: Future foresters, associations, plantation companies
 - Function:
 - message creation for different pieces of the supply chain
 - It's okay to harvest native species that are planted with purpose
 - Build public acceptance for forests
 - Engagement with Maori/small landowners

!1BT! – Monitoring and assessment

- Support from academia/researchers, civil society, industry and landowners (everyone should have a role!)
- Make sure to engage youth
- Build on or adjust National Forest Monitoring System
- Based on desired outcomes, you need define relevant metrics or indicators

!1BT! – Resource engagement

- Investment in nurseries
- An evolving implementation plan (iterative)
- Establishment subsidies for smallholders
- ETS scheme adjusted to better suit smallholders/Maori
- Reduce bureaucratic layers such as regional councils
- Linking 1BT to other ecosystem service programs
- Consider labor challenges and need for external workers

!1BT! – Market development and infrastructure for Natives

- Work to change building codes to make them more wood friendly
- Research into innovative capital for natives including looking at natural capital opportunities
- Outreach program to engage Maori/small landowners on management best practices
- Diversity research budgets away from nearly 100% radiata

!1BT! - Strategic Planning/Mapping

- It is a solution itself!
- Prioritize watersheds for first plans
- Needs to consider:
 - Inclusiveness with actors such as researchers, civil society, Maori, small holders associations, plantation companies, etc...
 - Topics such as water, biodiversity, areas prone to erosion, etc...
