REDD+ Readiness Key Findings

- Access to, use and availability of information and its use in capacity-building
- Effectiveness of multi-stakeholder participation and engagement mechanisms and processes
- Reform of policy and legislative frameworks, particularly those on tree and carbon rights
- Integration of REDD-plus policies with broader land-use plans and other sector and development plans
- Establishment of a revenue and benefits distribution system

Objectives of this Initiative

- Develop and understand the current state of REDD+ Benefit Sharing in several countries to identify the challenges of designing and implementing those mechanisms more broadly;
- Build a community of practice among locally-rooted, well connected REDD practitioners to share experiences and to develop practical tools that support effective, efficient and equitable benefit sharing for REDD+;
- Promote appropriate economic, policy and institutional arrangements at local, national and international levels to facilitate equitable and efficient delivery of REDD+ Benefit Sharing mechanisms.

REDD+ Benefit Sharing Scoping

23-24 March 2013 – Washington, DC

Key Challenges:

- Identifying and working with beneficiaries when rights are unclear
- Using multiple benefits to incentivize stakeholders at different levels and in different phases of REDD+
- Understanding the costs of REDD+
- Ensuring legitimacy of decision-making institutions and process
- Facilitating cross-level and cross-sector linkages in the design of REDD+ benefit sharing

REDD+ Benefit Sharing Scoping

Questions going forward

- What can be done in the immediate term to identify and work with beneficiaries when rights are unclear?
- On what basis can benefits be shared?
- How to reduce the costs of REDD+?
- How to design national programs that accommodate different local context?
- How to actively involve private sector?

Thank You!
