

REDD+ in Mexico

REDD+

The United Nations Framework Convention on Climate Change (UNFCCC) establishes 5 activities for REDD+:

Reduce

Emissions from

Deforestation and forest

Degradation

foster conservation,
management of forests,
and enhancement of forest
carbon stocks.

INTERNATIONAL RESPONSE

REDD+ implementation is applied in different phases according to the national context:

Fase 1

**Capacity
development and
national strategies**

Fase 2

**Policy and measures
implementation**

Fase 3

Payment over results

Early REDD+ actions

NATIONAL CONTEXT

Mexico has a solid legal framework which establishes new tools and structures to tackle climate change challenges and which are also relevant for REDD+:

- General Law on Climate Change (LGCC)
- General Law of Sustainable Forestry Development (LGDFS)
- General Law of Rural Sustainable Development (LGDRS)
- National Strategy for Climate Change (ENCC)
- Special Program for Climate Change (PECC)
- Note Project on Emissions Reduction (ER-PIN)

MEXICOS VISION TOWARDS REDD+

Problem

- Both, deforestation and degradation are complex problems
- It's not a simple cause-effect relation
- Many causes are not related to the forestry sector

Solution

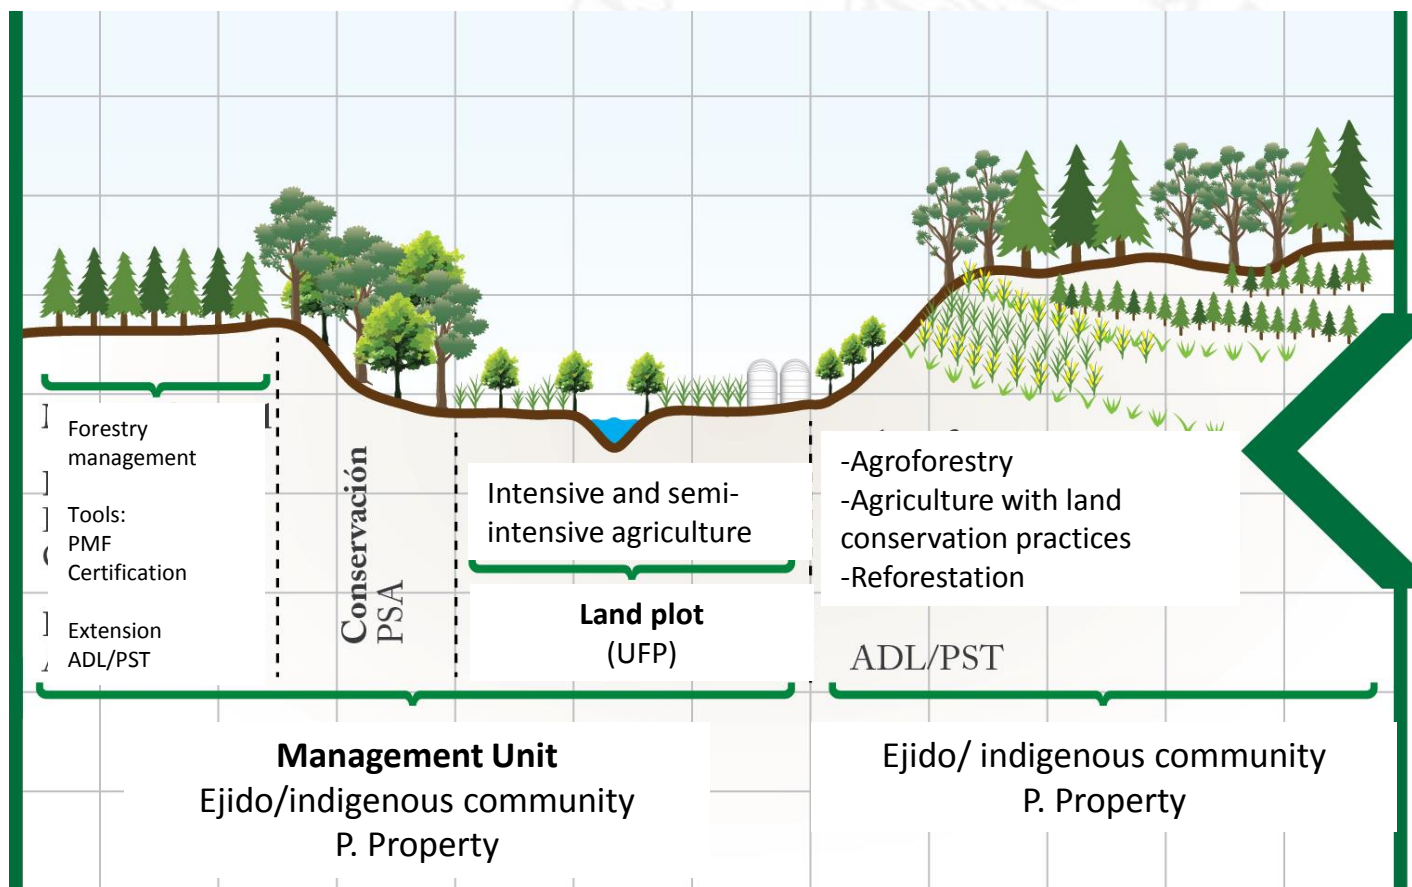

- Different level interventions that are all-encompassing.
- Impact direct and underlying causes.
- Develop integral frameworks for planning and land management that involve different actors in a collaborative fashion.

REDD+ IN MEXIO

- Integrate public policies that promote **rural sustainable development**.
- Incorporate and strengthen the **community management** of forests and the conservation of its **biodiversity**.
- Guarantee the **integral management of the land**.

INTEGRAL MANAGEMENT OF THE LAND

Strengthen the coordination and alignment of the programs.

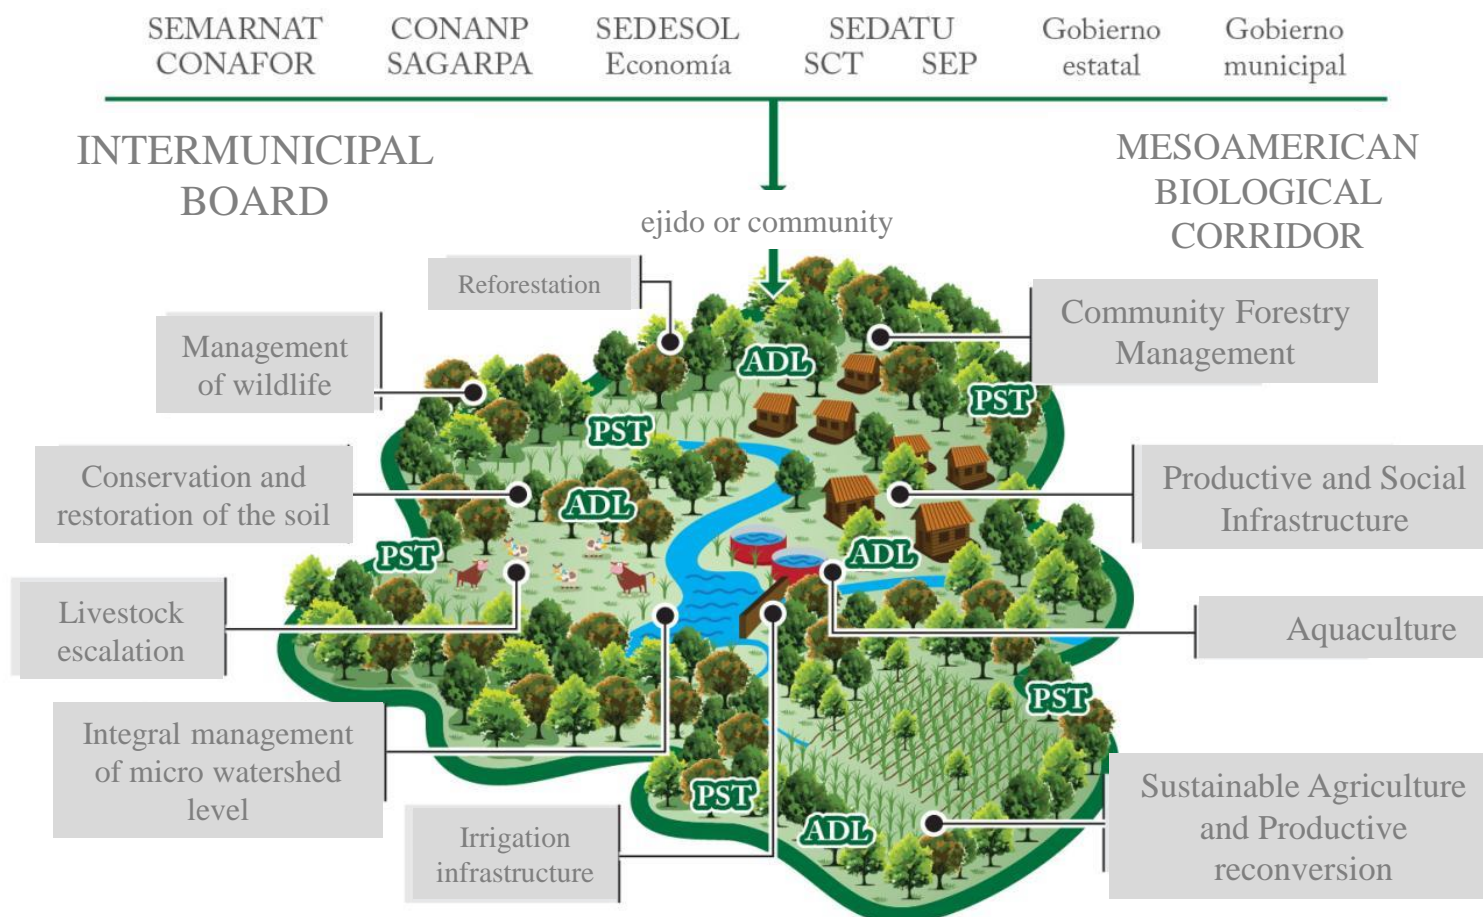

Generate and strengthen organization, management, administration, and implementation capacities.

Technical assistance.

Governance structures in the land unit.

Flexible mechanisms of financing.

INTEGRAL MANAGEMENT OF THE LAND

Conservation Area
Endowment Fund for
biodiversity

- Rehabilitation gaps
- Prevention of forest fires
- Black lines
- Brigade formation
- Fuel management
- Reforestation of native species, etc.

Agroforestry
module

- Plantinf of fodder species
- Agricultural and livestock module design
- Link to the livestock sector (SAGARPA)

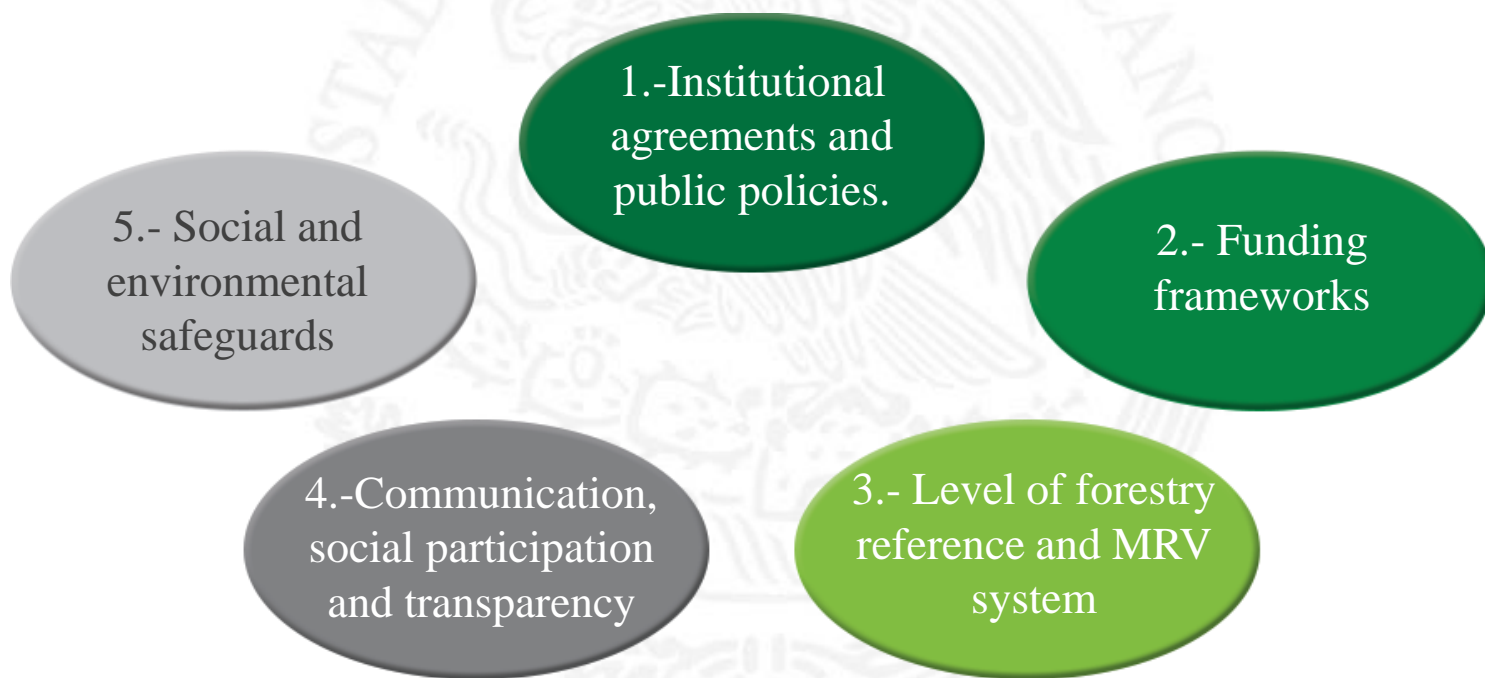

Forest
grazing

PMFM

- Community tree incubator,
- UMAS,
- Non-wooden resources,
- Wooden resources
- Community forestry
- Ecotourism projects.

Social
Property
