# Food, Fuel, Fiber and Forests

“As we get closer to 2050, maintaining a near zero deforestation rate will require forestry and farming practices that produce more with less land, water and pollution...”

# Initiative Objectives

- Provide thoughtful leadership, catalyze debate and rally influential stakeholders around solutions for conserving forest values, while meeting a growing world population's needs for food, fuel and fiber;
- Identify key issues on land-use, trade and lifestyle from a global perspective that warrant further dialogue (at international level or within a specific geography to explore if and how they can be reconciled with local or national aspirations);
- Establish specific and practical ways forward on key issues, and preparedness to pursue them, amongst stakeholders involved in, or targeted following dialoguing.

# Key Questions

- What are the key issues/fracture lines on land-use, trade and lifestyle from a global perspective that warrant further dialogue?
- What potential exists for common efforts among stakeholders to address these key issues/fracture lines?
- What should further dialogue, and practical actions linked to dialogue, focus on?

# Thank You!
